

To Whom it may concern, I have been a subscribing customer of XM radio for the past two years and have enjoyed every day of listening to what I PAY for. I think the time has come for the skeptics to wake up to the fact that technology has come of age. When satellite television came on board in the late 70's and progressed into the 80's, people were very skeptical of the fact it is here stay.

XM radio is here to stay as long as there are people willing to pay for the service. I will add that the service is EXCELLENT, as well as the clarity compares to listening to a CD. XM offers a wide variety of channels that the discriminating listener can't get from listener unfriendly free radio. I am not ashamed to say I purchased a radio and subscription totally for the Bluegrass channel. It was free radio broadcasting that put XM in in buisiness. The way I see it, if all your free broadcast listeners were happy, there would and could have never been an XM in the first place. YOU PEOPLE NEED TO LEAVE WHAT I PAY FOR AND LISTEN TO ALONE!!!!!!!!!!!!!!!!!!!!!!
